Callia chisel blenders are created using synthetic kolinsky sable and they are an amazing brush for soft blending. They also hold an incredible chisel edge that can create sharp lines when desired. It's one of my favourite brushes and I use them in almost all my water mixable oil work.

Painting with water mixable oil is so much fun. You can blend for hours without it drying which allows you to paint wet on wet without the stress! There is no need for toxic solvents or mediums so you are free to paint anywhere at anytime!

Supplies

Callia Artist Brushes

Callia Blending Brush Set

Set includes a 2, 4, 6 Chisel Blenders and a 10/0 Liner

Cobra Water Mixable Oil

Titanium White

Yellow Light or Primary Yellow

Pyrrrole Red

Magenta

Red Violet

Ultramarine Blue

Surface

Masonite, artboard or canvas

Additional Supplies

Grey Transfer Paper

Pencil, Pen and Eraser

Paper Towels

Painting The Daisy

Your daisy is a mixture of Red Violet and Magenta. You can use either one or both to create drama and interest. Blended flowers are painted by applying a dark, medium and light value and blending. Work on one petal at a time to establish your dark, medium and light, then blend. Apply additional highlights and shadows while the painting is still wet.

Dark Value: Red Violet or Magenta

Medium Value: Dark Value + Titanium White

Light Value: Titanium White + Medium Value

Highlight: Titanium White

Shading: Red Violet or Magenta and if desired a touch of Ultramarine Blue added to either of those colors.

Step 1

Apply the dark value at the base of the petal. Apply the medium value beside it and apply the light at the edge of the petal. Wipe the brush and pat blend. Continue working on one petal at a time.

Step 2

Apply highlights to the edges of the petals with Titanium White. Wipe the brush and pat blend. You may also load the chisel blender with white and stroke some color from the outer edge into the petal.

Step 3

Paint the center with Yellow Light or Primary Yellow. Shade with Pyrrole Red using the corner of your chisel blender. Apply Yellow in the highlight area and then Titanium White to further brighten. Use the liner to drop little dots of Pyrrole Red where the center meets the petals. Highlight with dots of Titanium White.

Line Drawing

I use transfer paper to trace out my designs.
